

GRADUATE PROGRAM IN COMPUTATIONAL ENGINEERING & SCIENCE

The School of Computational Engineering and Science (CES) is an interdisciplinary graduate program at McMaster University offering Ph.D. and Master's degrees (Master's degrees can be pursued with the thesis, project or coursework only option). Our program is open to well-qualified students with an interest in various aspects of applied computational science and scientific computing. All details regarding this program, including information about application procedures, are available at the webpage:

<http://computational.mcmaster.ca/>

There is a possibility of financial support for admitted students, including those in the coursework Master's program. Particularly promising candidates can also be invited for a campus visit prior to the beginning of instruction. Inquiries about the Program can be directed to the School's Director, Dr. Bartosz Protas (bprotas@mcmaster.ca).
